Our goal is to make it quick and easy for the contractor or hospital maintenance staff to create **PROFESSIONAL AND FUNCTIONAL** barrier system construction enclosures to simplify hospital infection control. dust barrier panels Infection Control Panels

We manufacture reusable, light weight panels that easily fasten together to create a dust free barrier system construction enclosure. We implement extruded aluminum and tough polycarbonate in our product.

Our panels meet or exceed infection control guidelines. Hospital infection control departments appreciate the clean appearance of our barrier system panels, temporary wall, construction enclosures and the fact that they are easily cleaned and sanitized.

It is our goal to give fair and equal coverage to all aspects of school life. There are, however, some things over which we have little or no control, including pictures that don't turn out, changed or canceled dates, students who left or enrolled late after pages have been submitted to the publisher, and students who miss both picture days due to absences.

Consequently, any omissions or errors are purely accidental and are in no way intentional on the part of the yearbook staff, the advisor, or the publisher. Every page is proofread before being sent to the publisher. We are sorry for any misspelled words or names, missing punctuation, or inaccurate credits in photo captions. We offer our apologies to anyone affected.
